*Mechanicam vero duplarem Veteres constituerunt: Rationalem quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique Mechanica nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut Mechanica omnis a Geometria ita distinguitur, ut quicquid accuratum sit ad Geometriam referatur, quicquid minus accuratum ad Mechanicam. Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.*

NEWTON

*La généralité que j'embrasse, au lieu d'éblouir nos lumières, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité.*

EULER

*... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum.*

LEIBNIZ

---

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely in original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding and excessively condensed or crabbed style.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

## CONTENTS OF VOLUME 39

ANTHONY, K.-H., Die Theorie der Disklinationen . . . . .	43
BRUSH, S. G., Interatomic Forces and Gas Theory from Newton to Lennard-Jones . . . . .	1
CANNON, J. R., C. D. HILL, & M. PRIMICERIO, The One-Phase Stefan Problem for the Heat Equation with Boundary Temperature Specification . . . . .	270
COLEMAN, B. D., E. H. DILL, & R. A. TOUPIN, A Phenomenological Theory of Streaming Birefringence . . . . .	358
DILL, E. H., see COLEMAN, B. D., et al. . . . .	358
HAINZL, J., Über globale Verallgemeinerungen des $\Pi$ -Theorems der Dimensionsanalyse . . . . .	30
HALL, W. S., Periodic Solutions of a Class of Weakly Nonlinear Evolution Equations . . . . .	294
HILDEBRANDT, S., Randwertprobleme für Flächen mit vorgeschriebener mittlerer Krümmung und Anwendungen auf die Kapillaritätstheorie. II. Freie Ränder . . . . .	275
HILL, C. D., see CANNON, J. R., et al. . . . .	270
HOWLAND, J. S., On the Weinstein-Aronszajn Formula . . . . .	323
KRANYŠ, M., Entropy Balance in a Multi-Component System of Gases Derived by Grad's Method . . . . .	245
KRESS, R., Die Behandlung zweier Randwertprobleme für die vektorielle Poissons-Gleichung nach einer Integralgleichungsmethode . . . . .	206
LEIS, R., Zur Theorie elastischer Schwingungen in inhomogenen Medien . . . . .	158
MARRIS, A. W., & C.-C. WANG, Solenoidal Screw Fields of Constant Magnitude . . . . .	227
MEIXNER, J., On the Linear Theory of Heat Conduction . . . . .	108
NITSCHE, J. C. C., Minimal Surfaces with Partially Free Boundary. Least Area Property and Hölder Continuity for Boundaries Satisfying a Chord-Arc Condition . . . . .	131
PALMER, J. T., see SMITH, D. R. . . . .	146
PRIMICERIO, M., see CANNON, J. R., et al. . . . .	270
RORRES, C., Low Energy Scattering by an Inhomogeneous Medium and by a Potential . . . . .	340
